NEW DELHI: Chinese smartphone maker Xiaomi on Wednesday said it has settled long-lasting patent disputes with IP Bridge, French telco Orange, and German conglomerate Siemens through, what the companies described as, a patent licensing transaction.

The patent licensing transaction will enable licensing of patent rights across multiple technologies from the companies to Xiaomi, as per a joint statement.

“Novus IP, a company owned by Mr. Paul Lin, the former "Head of IP Strategy" at Xiaomi, worked as a deal facilitator and helped Xiaomi and the three licensors successfully close this licensing transaction in a highly efficient manner,” the statement added.

Ran Xu, General Manager of Global Business Development and IP Strategy, at Xiaomi Group, said the company continues to explore complementary licensing models to the traditional patent pool and bilateral models in order to avoid “time-consuming disputes and to focus on innovation”.

“This unique transaction structure lets Xiaomi customers enjoy benefits of inventions from 3 companies, efficiently,” Xu added.

“For us, protection of innovation by patents is of high importance. We highly welcome this agreement, as it constitutes a mutually very satisfactory solution over litigations and appreciates the solution-oriented approach of all parties involved in the deal,” said Rudolf Freytag, Head of Licensing and Technology Acceleration, Siemens.

''We had the pleasure to cooperate with Siemens, IP Bridge, and Novus as a facilitator, delivering a fruitful result," said Lyse Brillouet, Vice President of Intellectual Property and Licensing at Orange.

"Thanks to Novus, we could efficiently close this deal with Xiaomi. We highly appreciate the sincere cooperation of Orange and Siemens throughout the deal," said Daisuke Honda, Managing Director, Head of License Business Department No. 1 at IP Bridge.
