Press Release

Qualcomm Signs 3G/4G Patent License Agreement with General Mobile

Accelerates 4G Device Deployment in Turkey and Adds to More Than 345 Existing Qualcomm Licensees Globally

OCT 8, 2017 | SAN DIEGO

Qualcomm products mentioned within this press release are offered by Qualcomm Technologies, Inc. and/or its subsidiaries.

Qualcomm Incorporated (NASDAQ: QCOM) and General Mobile today announced they have entered into a 3G and 4G patent license agreement. Under the terms of this agreement, Qualcomm has granted General Mobile a royalty-bearing patent license to develop, manufacture and sell 3G and 4G complete devices. With this agreement, General Mobile joins the growing list of OEMs around the world that have access to Qualcomm's leading technology.

General Mobile is a leading Turkish and regional smartphone brand, and partner of Google's Android One program, bringing high quality Android smartphones to Turkey and other markets around the world. Following the global success of General Mobile's GM 4G Android One and GM 5 Plus Android One, the company has expanded its portfolio offering to consumers in over 35 different countries. With today's agreement, General Mobile can further the success of their existing product portfolio, utilizing Qualcomm's advanced technologies to foster innovation, develop new 4G/LTE-A devices, and strengthen the mobile ecosystem in Turkey.

of General Mobile is extensive, and we are pleased to see their mobile devices powered by our industry leading technologies, serving consumers across Turkey and other parts of the world."

"We are excited to collaborate with Qualcomm to bring innovative and powerful products to the markets," said Sebahattin Yaman, chairman at General Mobile. "As part of the Android One program, we are committed to developing the next generation of high quality Android smartphones for customers around the world."

About Qualcomm

Qualcomm's technologies powered the smartphone revolution and connected billions of people. We pioneered 3G and 4G – and now we are leading the way to 5G and a new era of intelligent, connected devices. Our products are revolutionizing industries, including automotive, computing, IoT, healthcare and data center, and are allowing millions of devices to connect with each other in ways never before imagined. Qualcomm Incorporated includes our licensing business, QTL, and the vast majority of our patent portfolio. Qualcomm Technologies, Inc., a subsidiary of Qualcomm Incorporated, operates, along with its subsidiaries, all of our engineering, research and development functions, and all of our products and services businesses, including our QCT semiconductor business.
